Company Overview

Yellow Power Source SRL is a multidisciplinary engineering and technical consultancy firm established in 2013, delivering integrated solutions across **energy, infrastructure, mechanical works, and construction support**. The company operates under **CAEN 7112 – Engineering and Technical Consultancy**, with extended capabilities in **renewable energy, power generation, civil works, mechanical fabrication, and infrastructure development**.

Core Competencies

- **Engineering & Technical Consultancy**
- **Renewable Energy Systems**
- **Electrical Power Generation**
- **Mechanical Works & Fabrication**
- **Civil, Road & Railway Construction Support**
- **Technical Advisory & Project Supervision**

Past Performance

Yellow Power Source SRL has delivered a diverse portfolio of engineering, construction, and infrastructure works for public institutions, military facilities, airports, and private contractors. Key projects include:

Military & Defense Infrastructure

- **Demolition of Pavilion B – Military Base 1568 Mihail Kogălniceanu** Complete demolition works executed within an active military installation, including structural dismantling, debris management, and compliance with military safety protocols.

Airport & Strategic Transport Infrastructure

- **Construction Works – Charlie Runway & Helicopter Hangar Foundation** Execution of construction works on *Runway Charlie* and the foundation for the helicopter hangar at Mihail

Kogălniceanu Airport, supporting medium and heavy aircraft operations and rotary-wing infrastructure.

Civil & Municipal Infrastructure

- Road widening, stone-base reinforcement, and platform preparation works for multiple municipalities
- Site preparation, container relocation, and access road construction for healthcare infrastructure
- Mechanical equipment rental and operational support for major EPC contractors

Energy & Industrial Projects

- Solar energy system design and technical consultancy
- Electrical power generation and grid integration support
- Mechanical fabrication and industrial component preparation

Fleet & Equipment Inventory

Yellow Power Source SRL maintains a diverse fleet of vehicles and heavy equipment to support engineering, construction, and field operations. The fleet includes transport vehicles under 3.5 tons, intervention vehicles, leased corporate vehicles, and heavy machinery for civil works.

NSPA Pricing Compliance Statement

Yellow Power Source SRL confirms full compliance with NSPA pricing policy requirements. The company commits to offering NSPA prices **not higher** than those offered to the Government of Romania or other NSPO member governments for similar quantities and conditions.

If acting as a subsidiary, representative, or distributor, Yellow Power Source SRL confirms that prices received from partner companies are **not higher** than those offered to their own governments, and that prices quoted to NSPA will **not exceed** those received.

If the company has subsidiaries or distributors in other NATO countries, Yellow Power Source SRL confirms that prices offered to them are **not higher** than those offered domestically, and that it is willing to quote compliant prices to NSPA for items manufactured locally or abroad.

Yellow Power Source SRL affirms accuracy, transparency, and full adherence to NSPA procurement standards.
